Nimbus Notes - Admin Guide

Page 1: Setting up a Team workspace

Only the person who pays for the Team plan becomes the first admin. The first admin can promote up to five other members to admin. Admins can invite members by email or by sharing an invite link. Invite links expire after 7 days and can be turned off at any time from the Members page. New members join with the default folder permissions that the admin has chosen. If no default is chosen, new members get comment access to shared folders.

Page 2: Single sign-on

Single sign-on (SSO) is available on the Team plan only. Nimbus supports SSO with Google Workspace and Microsoft Entra ID. To turn it on, an admin opens Settings, then Security, then Single sign-on, and verifies the company domain with a DNS record. Domain verification usually takes less than one hour but can take up to 48 hours. Once SSO is required, members can no longer sign in with a password. Admins should keep one admin account outside SSO as a backup in case the SSO provider has an outage.

Page 3: Removing members and audit logs

When an admin removes a member, that member loses access immediately. Their notes are moved to the admin who removed them, and their share links keep working. The removed seat is not refunded, but it can be reused for a new member until the end of the billing year. Every admin action is written to the audit log. The audit log keeps entries for 12 months and can be exported as a CSV file from the Security page. Only admins can see the audit log.
